PROFILE

Full Stack Developer with hands-on experience in Laravel, Next.js, and RESTful API development. Skilled in building scalable multi-tenant applications, database optimization, and modern web technologies including MySQL, PostgreSQL, JavaScript, TypeScript, and Tailwind CSS.

WORK EXPERIENCE

Dworklab

May 2025 – May 2026

Backend Developer (Laravel) — Intern — Full-Time

- Started as a Backend Developer Intern in May 2025; promoted to full-time after completing a 3-month internship.
- Designed, developed and maintained modular RESTful APIs using Laravel and Eloquent ORM to support web and mobile clients, ensuring consistent data contracts between frontend and backend.
- Collaborated closely with frontend teams to integrate services, troubleshoot issues, and streamline data flows for improved user experience.
- Managed MySQL database design and optimized queries to improve performance and scalability of critical endpoints.
- Implemented robust input validation, error handling, and logging to increase API reliability and simplify debugging.
- Participated in code reviews, wrote tests, and followed CI practices to maintain code quality and enable smoother deployments.

PROJECTS

Swagat AI — AI Receptionist & Appointment Booking

Laravel 12, OpenRouter API, Laravel Sanctum, Spatie, Laravel Reverb, Facebook OAuth

- Designed and developed a multi-tenant SaaS platform using Laravel 12 with a tenant package, implementing shared database architecture with tenant_id scoping across all models.
- Built a RESTful API with Laravel Sanctum token-based authentication and Spatie Role & Permission package for granular role management.
- Integrated OpenRouter API for an AI receptionist supporting Nepali, English, and mixed-language conversations.
- Implemented Facebook OAuth 2.0 flow using Laravel Socialite with cache-based state management for secure token passing.
- Integrated Laravel Reverb WebSocket server for real-time dashboard updates, broadcasting student messages and AI replies instantly.

AI-Based Facial Recognition Attendance System

Python, OpenCV, Haar Cascade, LBPH, Laravel, MySQL

- Implemented Haar Cascade for real-time face detection and LBPH algorithm for accurate face recognition and user identification.
- Designed a Laravel-based backend for attendance management, user administration, and RESTful API communication with the Python recognition module.
- Stored and managed attendance records securely using a MySQL database with structured schema design.

Personal Portfolio Website

Next.js, React.js, TypeScript, Tailwind CSS, Vercel

- Designed and developed a fully responsive personal portfolio using Next.js, featuring project showcases and smooth UI interactions.
- Built reusable React components with modern layouts using Tailwind CSS; deployed on Vercel with optimized performance.

SKILLS

Frameworks: Laravel, Next.js, React.js
Languages: PHP, JavaScript, TypeScript, Python, HTML, CSS
Databases: MySQL, PostgreSQL
Styling: Tailwind CSS,
Bootstrap Tools & DevOps: Git, GitHub, GitLab, CI/CD, REST APIs, WebSockets

EDUCATION

Bachelor in Information Technology — Kist College, Purbanchal University Dec 2021 – Apr 2026
